

Simulation in Medical Emergencies Summer School 2019

August 5–9th, 2019

Monday Aug 5th, 2019

- Immediate Life Support (ILS) – ERC course
- Major Trauma – Assessment and Initial Management of Haemorrhagic Shock – clinical simulation scenarios

Tuesday Aug 6th, 2019

- Obstetric examination – workshop
- Major Trauma – Assessment and Initial Management of Head Injury – clinical simulation scenarios

Wednesday Aug 7th, 2019

- Focused Assessment with Sonography for Trauma (FAST) – course
- Major Trauma – Assessment and Initial Management of Abdomen Injury – clinical simulation scenarios

Why Join?

Summer school objectives are to provide medical students with the opportunity to learn and practice skills and procedures needed to take care of a patient in an emergency in a simulated environment. This year, the special focus of the summer school will be trauma management due to our guest – Gustavo Fraga, Professor of surgery from the School of Medical Sciences, University of Campinas in Brazil.
